## NIH Public Access Policy Now In Effect

As you may know from previous newsletters, the NIH Public Access Policy is now being enforced for all NIH awards with project or budget period start dates on or after July 1, 2013. So what does this mean to you?

Any article published after April 7, 2008 on which you are listed as an author that resulted from NIH funding (regardIA redI the PMCID number. This is different from the PMID

non-competing awards.

Over the next few weeks, the SODM will be reviewing a list of publications that the PubMed system has labeled as non-compliant to confirm that the policy does apply. Authors of those confirmed articles will be contacted to correct this in the system.

Any questions regarding the policy can bee pm oli7(s)-2(t)-6.6(a)10.d3(t)-6.6(o)10.5g iiciti -1630 or pam17@case.edu

In addition, staff form the Case Health Sciences Library will present a seminar regarding compliance with the NIH policy on Friday, June 14, 2013 at 9:00am in the Wolstein Research Building Auditorium. Please register online at https://research.case.edu/Education/Onlinecalendar.cfm.

## FY2013 Year-End Close

The Controller's Office recently sent out its 2013 Fiscal Close memo to the University community. As in the past, there will be two (2) sets of expense statements in June – a preliminary and a final. All FY2013 transactions must be completed by the dates set forth for the final June close. The table below shows the deadlines set by the Controller's Office to ensure items get processed in time:

x Preliminary June Close: All original and correction entries that occurred in May 2013 must be submitted for the Preliminary Close. Any adjustments/corrections for items that occurred prior to May will be process on an exception basis and only with an accompanying Late Cost Transfer form.

Salary and Non- Salary Journals/Adjustments m ust be entered by 5:00pm on June 28, 2013.

Research Supplements to Promote Diversity in Health-Related Research

The National Institutes of Health (NIH) and the Centers for Disease Control and Prevention (CDC) hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of NIH research grants, listed in the full Funding Opportunity Announcement (FOA) that funds are available for administrative supplements to improve the diversity of the research workforce by supporting and recruiting students, postdoctorates, and eligible investigators from groups that have been shown to be underrepresented in health-related research. All applicants are strongly encouraged to discuss potential funding requests with their Program Officer at the NIH.

## Improving Methods for Patient-Centered Outcomes Research

In this Improving Methods for Conducting Patient-Centered Outcomes Research (PCOR) Funding Announcement (PFA), we seek studies to address gaps in methodological research relevant to conducting PCOR. Results of these studies will inform future iterations of the Methodology Committee report and its standards.

June 17, 2013 – Letter of Intent (Limited Submission ) –

development activities. Of particular interest is the development of innovative and creative assay methods and validation of potential therapeutic targets that have previously been described.

Projects eligible for support include target development for: 1) small molecule inhibitors, 2) therapeutic antibodies and peptides, and 3) adjunctive therapeutics targeting resistance mechanisms that may not perpetuate the spread of resistance.

### Research Grant

Intended to provide limited support for meritorious dental implant research projects which include, but are not limited to, the following purposes:

- To conduct research which determines the feasibility of a larger research project. This may be described as the conduct of pilot studies of venture research.
- o To develop and test new techniques and procedures.
- o To carry out a small clinical or animal research project.
- To analyze existing data.

Up to \$25,000 over 2 years

AHRQ Grant for Health Services Dissertation Program (R36)

This announcement represents the continuation of an AHRQ program that provides support to individuals who are conducting research undertaken as part of an accredited academic program to qualify for a research doctorate degree. Applications for dissertation research grants must be responsive to AHRQ's mission, which is to improve the quality, safety, efficiency, and effectiveness of health care for all Americans. Agency research addresses issues of organization, delivery, financing, utilization, patient and provider behavior, outcomes, effectiveness and cost. It evaluates both clinical services and the system in which these services are provided. These scientific results improve the evidence base to enable better decisions about health care, including such areas as disease prevention, appropriate use of medical technologies, improving diagnosis and treatment in cost-effective ways, long-term care, and reducing racial and ethnic disparities.

to facilitate the development of new targeted and effective therapies for Oral Squamous Cell Carcinomas (OSCCs). The major intent is to move the field beyond phenotypic characterization of oral CICs and their niches and to support studies that provide actionable quantitative molecular data to target CICs effectively for the treatment of OSCC.

#### NIMHD Social, Behavioral, Health Services, and Policy Research on Minority Health and Health Disparities (R01)

The purpose of this Funding Opportunity Announcement (FOA) is to solicit innovative social, behavioral, health services, and policy research that can directly and demonstrably contribute to the elimination of health disparities. Projects may involve primary data collection or secondary analysis of existing datasets. Projects that examine understudied health conditions; examine the effectiveness of interventions, services, or policies for multiple health disparity populations; and/or directly measure the impact of project activities on levels of health disparities are particularly encouraged.

NLM Administrative Supplements for Informationist Services in NIH-funded Research Projects

The National Library of Medicine, in conjunction with NIH Institutes and Centers (ICs) named above, announces an Administrative Supplement opportunity available to eligible NIH awardees with active R01 grants and, in some cases, with active P01, P30, P50 and U01 grants (see details below)

These administrative supplements provide funds to supported research and center grants in order to enhance the storage, organization, management and use of electronic research data through the involvement of informationists, also known as in-context information specialists.

The purposes of this administrative supplement program are (1) to enhance collaborative, multi-disciplinary basic and clinical research by integrating an information specialist into the research team in order to improve the capture, storage, organization, management, integration, presentation and dissemination of biomedical research data and (2) to assess and document the value and impact of the informationist's participation.

Priority Populations Research

\*\*\*NOTE: This AHRQ announcement is not limited to the R01 mechanism.
All open AHRQ FOA mechanisms are available for this announcement\*\*\*

R01 Funding Mechanism: AHRQ encourages grant applications that propose research that focuses on the health care for AHRQ priority populations with specific emphasis in the following areas:

- Explaining disparities in health care and clinical practice;
- Implementation of research and interventions that aim to reduce disparities in priority populations and settings;
- Addressing known gaps in research dealing with priority populations;
- Development of methods to address the heterogeneity of priority populations, small sample sizes and to improve outcomes for priority populations in AHRQ sponsored research;
- Research on cross cutting issues involving multiple priority population groups and settings (for example, disabled children, minority women, rural maternal and child health, etc.);
- Development of innovative service delivery models for settings in which priority populations receive care.
