

The Department of Environmental Health and Safety is dedicated to the safety of the entire Case Western Reserve University community.

EHS is a very time-consuming task and may at times be a frustrating process. of this facet of our work and is dedicated to providing robust safety programs, while at the same time balancing the burden placed on the community as much as possible.

Over the last few years EHS has rolled out new training programs with interactive features, rotating quizzes, automated training requests, and other value added features. Over the next few years EHS will roll out an interactive document system that will allow the researcher to have an online, on demand hand on their safety interactions with EHS. This system will allow an researcher to log into the system, ascribe the workers that work for them, fill out CHP and ECP forms in real time, share those and other regulatory documents with their staff, and see a dashboard that shows the training requirements and status of all their works. Other features will include automated waste pickups, fumehood service request, and the ability to ask and have questions answered in a forum. More advanced features will come with time. If you have requests for features please contact our office and share your thoughts.

Chemical Hygiene Committee.

7. **Provisions** for additional worker protection for work with particularly hazardous substances. These include “select carcinogens,” reproductive toxins and substances that have a high degree of acute toxicity. Specific consideration must be given to the following provisions and shall be included where appropriate:
- a. Establishment of a designated area.
 - b. Use of containment devices such as fume hoods or glove boxes.
 - c. Procedures have been developed for handling hazardous materials.

“Worker training must include the physical and health hazards of chemicals in the work area.”

The Importance Caution Signs

It is four o'clock in the

“The plans (CHP and ECP) must be revised annually or any time changes occur in the laboratory.....”
