

Case Western Reserve University School of Medicine

Master of Public Health

Develop the skills you need to improve the health of individuals and communities through education, research and service in the Master of Public Health (MPH) program at Case Western Reserve University School of Medicine, a top-25 medical school in the U.S.

Program Benefits

Accredited by the Council on Education for Public Health, our MPH program gives you the experience you need to pursue a career in direct service, public policy, community-based clinical care or healthy choice campaigns.

Designed as a 42-credit hour, flexible course of study, you can complete your MPH in four semesters over as few as 16 months, with part-time options also available. And, with five program concentrations and 11 dual-degree options in partnership with schools across campus, you'll tailor your education around your career goals.

Choose from concentrations in:

- Population Health Research
- Global Health
- Health Policy and Management
- Health Promotion and Disease Prevention
- Health Informatics

While studying, engage in research with our world-renowned faculty, pursue internships with partner organizations, and leverage our connections with top-tier local healthcare systems to gain real-world experience and network to prepare for a successful career.

Program Structure (42 credits)

18 Credit Hours representing the fundamental domains of public health
