

COVID-19 Required Vaccinations

COVID-19 - completion of the initial vaccine series plus booster. Students may request a medical or religious exemption but are advised that clinical partners have their own requirements to which the CWRU exemption does not apply. Unvaccinated students may encounter challenges finding sufficient clinical experiences to complete graduation requirements. If a student chooses to receive the exemption, then their graduation may be delayed due to the possibility of low clinical hours or missed clinical specialties from training site requirements. To see more details about medical and religious exemption processes, visit the COVID-19 accommodations website: <https://case.edu/equity/accommodations/covid-19-accommodations>

Tuberculosis Screening for MSA Program Students

Annual tuberculosis (TB) screening is required for all MSA PEQ12 6 Tm0 (1) 075.96) JTCn BTF2 11 Tf
